INTRODUCTION

The United Nations Environment Program (UNEP) was created in 1972 as a direct result of the International Conference on Human Environment held in Stockholm, Sweden. UNEP is an independent agency of the United Nations with headquarters in Nairobi, Kenya. Its establishment evolved around three goals:

1. To promote international cooperation in the environmental field.
2. To keep under review the world environmental situation in order to assure that environmental problems of wide international significance receive appropriate consideration by governments.
3. To promote the acquisition, assessment and exchange of environmental knowledge.

In order to assist in carrying out these goals, several programs were created within the UNEP structure, one of which was the International Referral System (UNEP/IRS). In January 1979 this referral system was renamed INFOTERRA, an acronym that will be used by all four of the U.N. languages (English, French, Russian and Spanish). Composed of a network of over 110 national and sectoral Focal Points, INFOTERRA is engaged in identifying and registering sources of environmental information, transmitting these sources in a unified format to the System's central data bank in Geneva, Switzerland, and serving as a point of contact for users who need referral services (national and international). INFOTERRA is a referral service designed to link those who need environmental information with those who have the desired information.

In March 1975 the State Department designated the U.S. Environmental Protection Agency to serve as the U.S. National Focal Point and EPA formally opened the Center on October 6, 1975, at its Headquarters in Washington, D.C. The U.S. National Focal Point has been named the United States International Environmental Referral Center (USIERC).

GENERAL INFORMATION ABOUT THIS DIRECTORY

This directory includes environmental information sources registered with the U.S. International Environmental Referral Center as of October 1, 1980. It is by no means a complete listing of all sources because registration is voluntary.

This 4th Edition includes 1,495 United States sources from among groups such as:

- Business and Industry
- Consultants
- Engineering Firms
- Federal Agencies
- Information Centers
- Laboratories
- Societies and Associations
- State and Local Governments
- Universities

Those interested in registering as a source and those needing additional information about this service are encouraged to contact the Center at the following address:

United States International Environmental
Referral Center (USIERC) (PM-213)
U.S. Environmental Protection Agency
401 M Street, SW (Room 2903 WSM)
Washington, D.C. 20460

HOW TO USE THE DIRECTORY

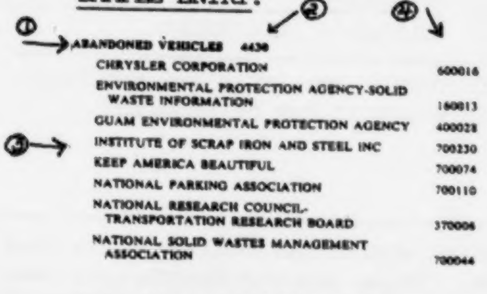
In order to provide maximum and efficient access to information on registered sources, the United States Directory is divided into four parts:

1. Section 1: Subject Attribute Listing
2. Section 2: Directory of Sources
3. Section 3: Alphabetical Listing of Registered Sources
4. Section 4: Geographical Listing of Registered Sources (by State and City)

Section 1: Subject Attribute Listing

This section is alphabetized according to the specific environmental subject terms (called attributes) which are included in INFOTERRA. The registered sources having information on these terms are listed alphabetically under each subject.

SAMPLE ENTRY:



ABANDONED VEHICLES 4430

CHRYSLER CORPORATION	600016
ENVIRONMENTAL PROTECTION AGENCY-SOLID WASTE INFORMATION	160013
GUAM ENVIRONMENTAL PROTECTION AGENCY	400028

NATIONAL SOLID WASTES MANAGEMENT ASSOCIATION	700044

1 = Attribute (subject term)

2 = International code for INFOTERRA identification purposes

3 = Name of source (alphabetized)

4 = Number of Source

Once the specific subject of interest is located in this section, pertinent information about each source can be found in Section 2 by referring to the specific source number.

Section 2: Directory of Sources

This section is arranged numerically by assigned source number. These numbers are obtained from Sections 1, 3, or 4 of this Directory.

These are the descriptors used in matching requirements of users to holdings of sources.

The numbers preceding the word terms in this directory are international codes and make it possible for the INFOTERRA National Focal Points to communicate in any language by using codes instead of words.

Section 3: Alphabetical Listing of Registered Sources

This section includes a complete alphabetical listing of all U.S.A. registered sources by organization and assigned source identification number. It can be most helpful in discovering whether a particular organization is registered. If specific information is desired about a particular organization, then it can be found in Section 2 by using the source number.
